

# UHF LIBERTY REPEATER - ANALOG

## UHF ANALOG REPEATERS

[CONTACT SALES](#)
[CONTACT SUPPORT](#)

The Liberty Repeater is the perfect wireless solution for on-site communication needs. Industrial plants, stores, schools, golf courses, and other "tough-to-cover" applications no longer need to suffer from the limitations common to all brands of portable two-way radios.

When properly located and matched with the appropriate antenna the Liberty repeater provides rock solid communication from one radio to another, virtually eliminating shadowing, fading, and dead spots.

Rugged and compact, the UHF analog Liberty repeater is a completely integrated full duplex wireless solution. The Liberty repeater is an integrated ground-up design resulting in an efficient, full duplex, on-site repeater. Big in performance and features, yet small in size and price, the Liberty repeater is cost-effective and measures only 2.125"H x 8.0"W x 5.75"D. It's all-metal, powder coated, extruded aluminum housing provides durability and protection for the RF electronics and 4 cavity notch-type duplexer, built-in mounting flanges and included AC to DC power supply make installation easy (antenna not included). Ideal for use at: Golf Courses • Schools • Construction Sites • Retail Stores • Colleges • Hospitals • Assisted Living Facilities • Shopping Malls • Manufacturing Plants • Warehousing • Amusement Parks • Special Events
